

## Attachment 11

### Analysis of Four Weeks Of TruGreen Electronic Payroll Data Showing Wage Violations

**Key:**

-  Workers highlighted in red received less than the hourly wage that appeared in Box 12 of the ETA-750 used to obtain their visas. In most instances, these workers also earned less than the wage offered in their Disclosure Affidavits and less than the prevailing wage in effect at the time they commenced work.
-  Workers highlighted in violet received less than the hourly wage that offered in their Employer Disclosure Affidavits and, in most cases, less than the prevailing wage in effect at the time they commenced work.
-  Workers highlighted in yellow received less than the prevailing wage in effect at the time they commenced work.

**Note:** This chart understates the number of workers affected by wage violations because it includes commissions paid to workers in calculating their average wage. Just to give two examples, Martin V. Leon (line 219 on this chart) worked 52.67 hours and earned \$719.71 during his 2<sup>nd</sup> week of work for an effective hourly rate of \$12.28/hr., somewhat above the offered wage of \$11.36/hr. However, \$142.44 of his earnings came from commissions. *See App. Attachment 12, line 1097.* If those commissions are excluded, his effective hourly rate from his salary was only \$9.78, well below the \$11.30 offered in TruGreen's ETA-750. Jose Rodriguez, (line 392 on this chart) worked 54.81 hours his second week and earned \$708.88 for an effective wage of \$11.39. However, \$124.50 of his earning came from commissions. *See App. Attachment 12, line 774.* Thus, his actual hourly rate, excluding commissions, was only \$9.38/hr – well below the \$10/hr promised in the ETA-750 and employer disclosure affidavit. These are just two examples of many; are they shown in orange on the chart.

**Data Source:** All information payroll information on the attached summary was produced by TruGreen. The column labeled "HOURLY RATE ETA-750" is taken from TruGreen's ETA-750s Box 12 (App. Attachment 1). The columns labeled "ACTUAL RATE PER HOUR" are calculated by dividing the total earnings for the week by  $[40 + (\text{O.T. hours} \times 1.5)]$ . This calculation results in the effective hourly wage paid for the first 40 hours. If the worker were paid this wage and time and a half for the overtime hours, his earnings would equal those reported by TruGreen.
